#### introduction

La demarche d' analyse avec  ${\bf R}$  est une étape importante du statisticien dans son travail .

ce livre présente les analyses faite sur la base des données **Ferman Crédit** dans lequel nous abordons les méthodes der machine learning avec le **Tidymodels** package.

Cgargeons donc les libraies néccaises

Chargeons nos données

```
library(caret) # pour ls donnes GermanCredit
data("GermanCredit")
```

Remember each Rmd file contains one and only one chapter, and a chapter is defined by the first-level heading #.

Vous trouverez les contenu de ce libre dans mon github: https://github.com/s chadramulekya/.

#### Description de la base des données

Data from Dr. Hans Hofmann of the University of Hamburg.

These data have two classes for the credit worthiness: good or bad. There are predictors related to attributes, such as: checking account status, duration, credit history, purpose of the loan, amount of the loan, savings accounts or bonds, employment duration, Installment rate in percentage of disposable income, personal information, other debtors/guarantors, residence duration, property, age, other installment plans, housing, number of existing credits, job information, Number of people being liable to provide maintenance for, telephone, and foreign worker status.

Many of these predictors are discrete and have been expanded into several 0/1 indicator variables

Source UCI Machine Learning Repository

```
par(mar = c(4, 4, .1, .1))
plot(pressure, type = 'b', pch = 19)
```

Reference a figure by its code chunk label with the fig: prefix, e.g., see Figure 2.1. Similarly, you can reference tables generated from knitr::kable(), e.g., see Table 2.1.

```
knitr::kable(
  head(iris, 20), caption = 'Here is a nice table!',
  booktabs = TRUE
)
```

You can write citations, too. For example, we are using the **bookdown** package (Xie, 2021) in this sample book, which was built on top of R Markdown and

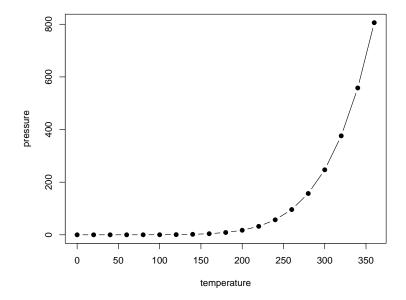

Figure 2.1: Here is a nice figure!

## Literature

Here is a review of existing methods.

## Methods

We describe our methods in this chapter.

# **Applications**

Some significant applications are demonstrated in this chapter.

- 5.1 Example one
- 5.2 Example two

## Final Words

We have finished a nice book.
